

A new world. A shared expedition.

Earth2037 refreshes its world map and brings commanders together in Relic Expedition.

Actual gameplay | iPhone 13 | Native iOS 2.31 (237) | 13 Oct 2026

Build a science-fiction city, develop resources and technology, recruit commanders, and explore a shared world. Earth2037 is an established online strategy game with an October update for returning players and new commanders.

WHAT CHANGED IN 2.31

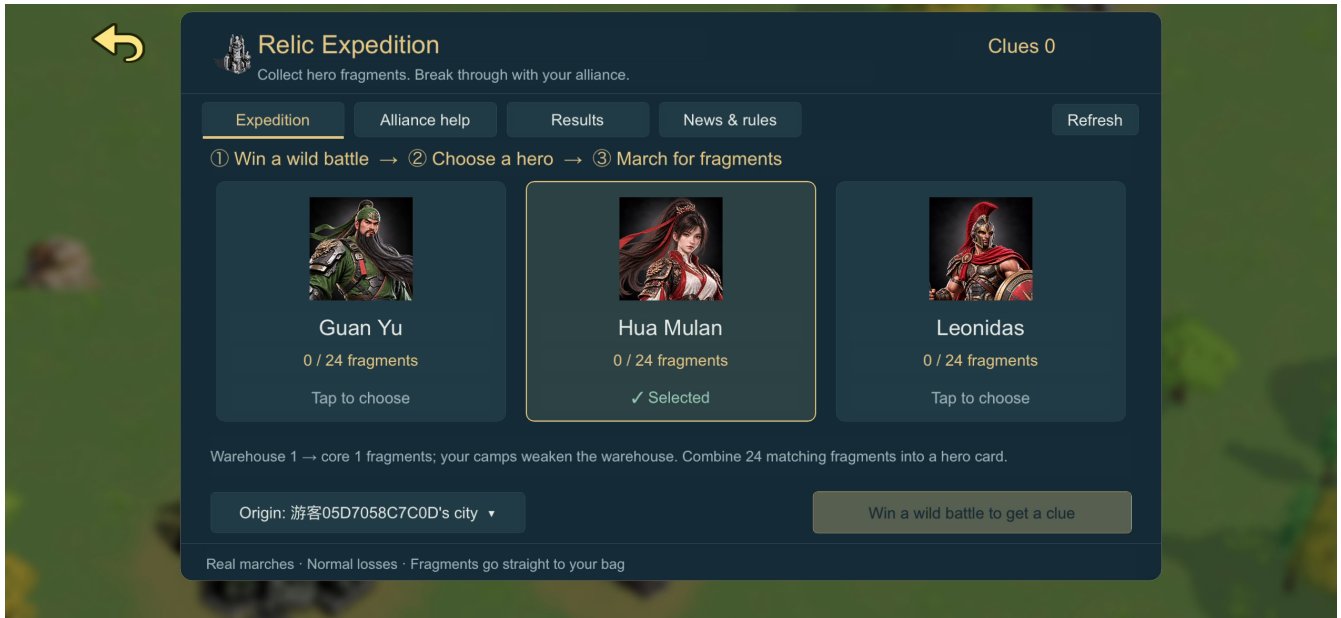

Version 2.31 enables the new world map by default, with improved terrain transitions around cities, forest distribution, grass and map performance. Players can return to the classic map in Settings. Tutorials are easier to exit, while chat, Settings and the full menu remain accessible.

Available on iPhone and iPad. English and Chinese interfaces. Internet connection required; optional in-app purchases.

RELIC EXPEDITION

Choose a hero. Help your allies.

Guan Yu, Hua Mulan or Leonidas - one shared route from fragments to recruitment.

Actual gameplay | iPhone 13 | Native iOS 2.31 (237) | 13 Oct 2026

Choose Guan Yu, Hua Mulan or Leonidas and work toward their hero fragments. Win the first ordinary wild battle of the UTC day to earn a Relic Clue, then start an expedition near one of your cities. Clear its warehouse and core, and help alliance members with support camps.

The warehouse and core each grant one fragment to the expedition owner. Eligible allied support clears grant one fragment, up to two rewarded assists per day. Combine 24 fragments for the same hero into a Hero Card, then use it to recruit the hero. Normal troop losses apply.

The current Relic Expedition runs through November 1, 2026 at 23:59:59 UTC. New expeditions close during the final hour. Each expedition lasts up to 24 hours within the event period.
